(57) **ABSTRACT**

A container (10a) comprising a metal frame (164) for holding product therein during shipment and being returned for reuse has a base (166) and opposed sides, L-shaped tracks (60), and a plurality of padded dunnage supports (94) extending between the tracks (60). One type of padded dunnage support (94) comprises end members (98) and a tubular middle member (102), the end members (98) being movable along the tracks (60). The padded dunnage supports (94) support dunnage (136), such as pouches (138).
